

**PRESS RELEASE 13/2023**

## **cargo-partner introduces new air freight consolidation services between Western Europe and Asia**

**The international transport and info-logistics provider has once again expanded its service portfolio with a range of new air freight solutions, consolidating shipments between key airports across Western Europe and various locations in Asia.**

As cargo-partner continues to grow its profile and operations across Western Europe, the logistics specialist now offers a comprehensive number of weekly air freight solutions from major airports in Austria, Germany, the UK, Sweden, and the Netherlands to over ten destinations across India, China, Singapore and Thailand.

Jo Feiks, Corporate Director Product Management Air Cargo, explained: “As air freight peak season is about to take off in the coming weeks, we’ve launched new air cargo connections between Western Europe and Asia to give our customers more flexibility and provide reliable freight capacities at competitive rates. Consol solutions are the clear winner when it comes to cost-effective shipping, while still benefiting from the speed of air freight and the reliability of fixed weekly departures.”

With the new weekly air freight consols, cargo-partner provides door-to-door solutions from Western Europe to Delhi, Bangalore, Mumbai, Chennai, Shanghai, Bangkok, Hong Kong and Singapore. The service includes pre-carriage from anywhere in Western Europe as well as delivery throughout India, China and Thailand, making use of cargo-partner’s warehouses and trucking services on both ends.

Fast distribution is enabled by cargo-partner’s logistics hubs at strategic locations in Asia, including modern warehouse facilities in Bangkok, Singapore, Ho Chi Minh City, Hong Kong, Shanghai, Kunshan, Shenzhen, Yantian, and the recently opened warehouse in Guangzhou, completing the logistics provider’s network of over 20,000 m<sup>2</sup> of warehouse space in China.

“Our strong presence in Europe and Asia allows us to deliver an integrated package of transport, storage, customs and tracking services, ensuring seamless, end-to-end solutions for our customers from all industries. The weekly air consol services are especially popular with our customers from the electronics, automotive, fashion and retail sectors, who benefit from this solution to find the optimal mix between speed and cost for their shipments,” added Jo Feiks.
