Unloaded at T/S port
Loaded at T/S port
Departure at T/S port

Arrival
Unloaded from vessel
Gate out full at port
Delivery to consignee
Return empty container

Your Challenge

▶ Difficult to get accurate milestones and status updates
▶ Low carrier schedule reliability
▶ Lack of planning certainty
▶ Need for "extra buffer" in your supply chain

Our Solution

▶ Updated ETAs based on GPS info
▶ Combined data from a variety of sources: carrier, port and terminal information and status updates, vessel location data sent via AIS
▶ Alert function enables management by exception

Your Benefits

⊘ Full transparency over your container transports
⊘ 24/7 real-time information
⊘ Mitigate demurrage and detention costs
⊘ High data reliability
